Preface

Institutions of higher learning engage in research and creative activities as integral parts of their educational functions. It is through such activities that our knowledge is increased and achievements are made to further the well-being of the general public. The articles, books, published research reports, major recitals or other significant refereed creative achievements, graduate theses and research papers, extramural grants, and faculty/student collaborations produced by the faculty, academic staff, and students serve as indicators of the contributions that the University of Wisconsin-Eau Claire is making to the expansion of knowledge and the arts. UWEC is pleased to acknowledge these achievements of its faculty, academic staff, and students.

The 1998-1999 Report on Publications and Other Scholarly Achievements represents, of course, only a small fraction of the total efforts of our faculty, academic staff, and students in research and creative activities. Some of our efforts do not lead to information that can be disseminated in an externally published form. However, the level of effort recorded in this *Report* is one measure of the achievements of UWEC.

Of the activities catalogued in this *Report*, nine reasonably distinct categories can be identified:

1. publications which expand disciplinary frontiers of knowledge;
2. publications which transcend disciplinary boundaries by relationships with other disciplines;
3. publications which provide practical applications for research-generated knowledge;
4. publications which synthesize or reiterate research findings for newly identified audiences;
5. published creative works;
6. significant refereed activities which transmit a cultural/artistic heritage and/or expand or deepen the audience's horizons;
7. extramural grants which provide funding for research and sponsored programs;
8. faculty/student collaborations which enrich the scholarly experience for all involved and result in a tangible product such as a paper, a poster, a presentation, a non-print media form, a musical composition, or a new chemical compound; and
9. master theses and graduate student research papers. Copies of the theses and research papers are held in the William D. McIntyre Library of UWEC and are available for public inspection. Theses on file in the McIntyre Library are listed in *Master's Theses in Education and Master's Theses in the Arts and Social Sciences* published by Research Publications, Cedar Falls, Iowa. The theses and research papers are included here to acquaint individuals both within and outside of UWEC with the diverse range of research and other scholarly activities undertaken by some of our graduate students as they pursue advanced degrees. Such listings also reflect the research interests of UWEC faculty because the students work closely with them in pursuing their research efforts.

A university is a collection of diverse groups of individuals representing numerous areas of expertise. It is through such diversity and interaction of disciplines that UWEC gains its strength. This *Report* illustrates such diversity and interactions of our institution. Examples of the scholarly works cited in this *Report* can be found on display in a special case located on the west side of the entry corridor of McIntyre Library.

Explanations, Notes, and Comments

Distribution of the 1998-1999 Report on Publications and Other Scholarly Achievements.

All faculty and academic staff receive a copy of the *Report*, and each academic and administrative office receives three copies. A small stock of extra copies has been printed so that

interested individuals may receive extra copies by calling 715/836-3405. Suggestions and comments for improving the *Report* should be sent to Assistant Vice Chancellor Christopher Lind.

Inclusions and Exclusions. Faculty and academic staff members with joint appointments have been listed under the single unit they selected as their primary appointment for purposes of this *Report*. The departmental affiliation of faculty, academic staff, and students is also noted. The index includes only those faculty and academic staff who were employees of UWEC and students enrolled between May 1998 and April 1999, and those graduate students whose theses or research papers were accepted by their College between May 1998 and May 1999. Students whose abstracts were accepted by the Office of Research and Sponsored Programs for inclusion in the Seventh Annual UWEC Student Research Day on April 26-27, 1999 are also included in the *Report*. In addition to publications and creative achievements during the 1998-99 academic year, this *Report* includes items bearing publication dates from May 1997 to April 1998 that were inadvertently omitted from the last report or actually published in 1999 (with an earlier date on the cover due to a journal being backlogged). The next issue will cover the period of May 1999 to April 2000. Every attempt has been made to be complete and accurate within the ground rules established for the *Report*. Members of the Editorial Advisory Board screened all entries as to their appropriateness for inclusion.

Acknowledgments. The Editorial Board appreciates the hard work and cooperation of those who assisted with this publication. Faculty and staff members who carefully and promptly completed their submission materials provided momentum, and administrative offices' submissions and speedy transmittal of the materials further aided the work.

Academic Affairs—Administrative
